# Brand guidelines for social media

## Kol Accesorios · retail

**Manual v7 · Instagram and Facebook · October 2026**

The logo is now vector: traced from the official files, with the right version for each background.

# What this manual is for

To assess where we stand and build on what already works.

**These guidelines look at where we are and at what marketing can do to strengthen what is already being done well.**

They rest on two things: the measured performance of the posts (views, likes, reach, counted one by one) and the laws of graphic design and perception: hierarchy, contrast, space, proximity.

So when a post shows up as improvable, it is not personal: it was measured. The manual points at the rule, not at whoever made the piece.

1. **The spark is still Manu's**
   The vibe, the humour and the creativity of the account stay with Manu, who runs Kol's social media and online community. The manual gives a system, not a corset.

2. **What is fixed and what is free**
   Logo, colours, type and fixed positions are respected; the content, the joke and the idea of each post are free.

3. **Next step: Canva Pro**
   The idea is to set up Canva Pro with rebuildable templates that take care of these rules on their own. That comes after the manual is approved.

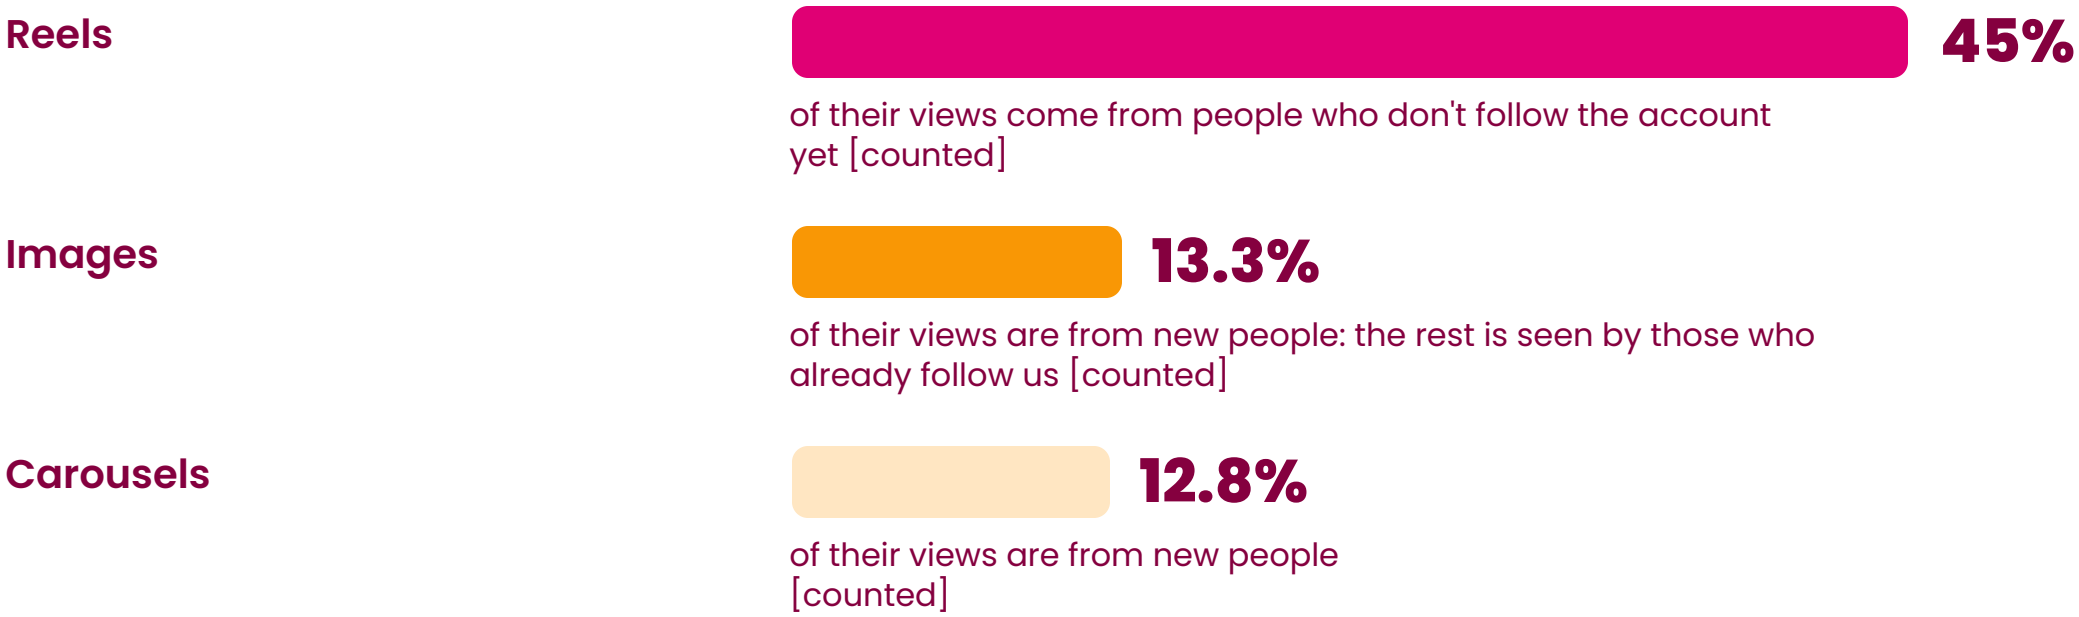
# Reels are the only door to new people

What share of each format's views comes from people who don't follow us.



What it means: if we want to grow, reels are not just another format: they are the door. A reel brings more than three times the share of new people that an image or a carousel does. That is why chapter 09 · Reels and human content is the one that most needs to grow, and that is where the full evidence lives.

It is a reference manual, not one to read straight through.

**1**

### Whoever designs

What looks the same in every piece and what can vary: logo, colour, type, shapes and photos.

**2**

### Whoever posts and replies

What to say and how: voice, copy on the pieces and the checklist before posting.

**3**

### Whoever approves

What changes from what exists today and why: every rule comes with its measured figure.

**4**

### Whoever appears

The team at the stores: how they are shown and the photo permissions.

**✓ WHAT IT IS**

The guide for Kol Accesorios retail on social media: Instagram as the main channel and Facebook as the secondary one. How every piece looks and sounds, with real Kol posts.

**✕ WHAT IT IS NOT**

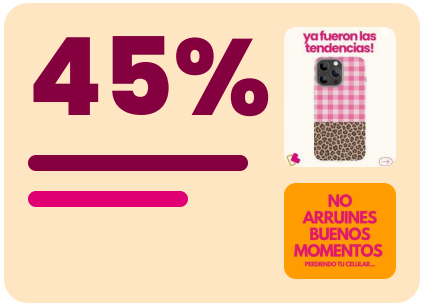
It is not the Kol Franquicias guide (another brand, another palette). It does not cover the website, TikTok or YouTube, nor how to load the pieces into Canva: that comes once the manual is approved.

Scope as of 10/10/2026 · at most 1 in 10 posts may be devoted to the franchise; never two in a row (ch. 02)

# Every chapter has five stops, always the same

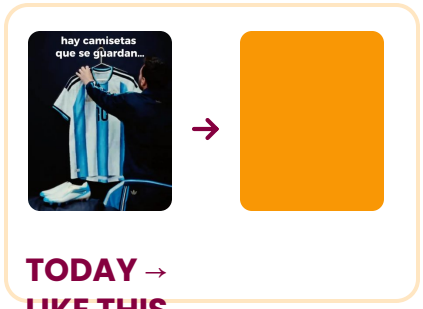
## 1 Opening

Orange page with the number and the idea in one sentence.



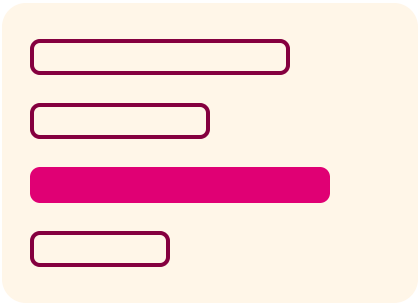
## 2 Today

The topic's cover: real posts with their code and counted figures.



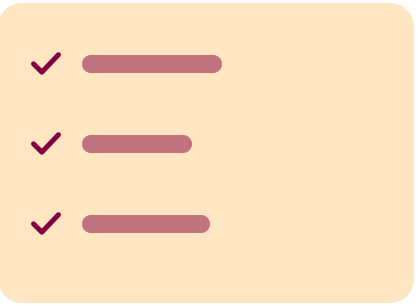
## 3 Rules

Each rule with a real post that breaks it and the same post redone.



## 4 Infographics

The data and the tables, as diagrams: no running text.



## 5 Closing

What changes, what doesn't, and the short list before posting.

---

Exception: Voice and tone may go without images. The «Like this» examples start from a real KoI post, redone or adjusted; when a piece is built only to explain something, its caption says so: [mock-up] or [made up].

The thumbnails are the five templates from the v4 slide catalogue

# The marks you will see on every page

Golden rule: every text sits right next to its image.

**✕ TODAY / NOT LIKE THIS**

How it is today: always a real post with its code.

**✓ LIKE THIS**

The same post, redone or adjusted with the rule.

**→ ADJUST OR REDO**

Adjust if a detail fails (contrast, type, spelling); redo if there is no fixing it.

# The mix with the franchise starts in the profile

1. Retail message: «venta de accesorios para dispositivos».
2. Franchise message, three lines down.
3. A loose figure, «3000», with no context.
4. The link mixes the two audiences again.

# The concept in five lines

1

## Like walking into a store

Bright and warm, with real people and an accessory in hand: own photos before stock photos.

2

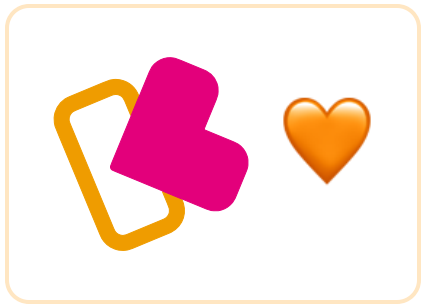
## Orange and magenta

The orange of the storefronts is the background; the magenta of the symbol, the accent. No black, no brown.

3

## Poppins and Roboto

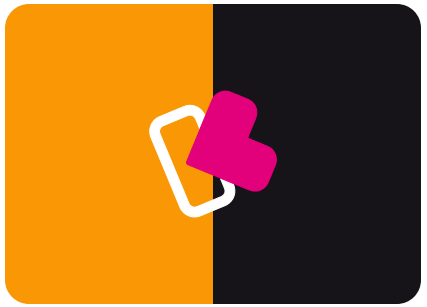
Round, friendly titles, information that reads in a second.



4

## The symbol is the signature

One single piece, always. The 🧡 in the copy closes the tone.



5

## Family with the franchise

They share the symbol and the magenta; they part by the background: orange here, black there.

Each line is developed in its chapter: photo and video (08), colour (04), typography (05), logo (03); the family, in this one. The black in the last image belongs to Kol Franquicias.

✓ Shows products; team with Kol merch.

### It reads FRANCHISE if it has

4. Black background with amber as the accent.
5. «KOL FRANQUICIAS» label in a box, with wide tracking.
6. Serious Montserrat, no emojis, with a button rectangle.

✕ It speaks to an investor, not to a shopper.

# Mixed signals: clean it up, don't redo it

## The product stays; what is foreign gets erased

1. Today: stitched label and thin grey type, another brand's style: it reads as another store, not as Kol.
2. The product and its artwork are kept: the label and the «ya disponibles» are removed with Canva's magic eraser.
3. On top goes Kol's: the colour symbol in the light area and the message in Poppins, at the bottom, in the quiet zone.

The new rule. These pieces are no longer redone from scratch: what is foreign is cleaned off and the piece is signed as Kol.

# Supplier material also gets signed as Kol

## The video is respected; the signature goes where it shows

1. Today: the video goes as is, with the label in the supplier's type and no Kol.
2. The background is respected; the label is not: it is removed with the magic eraser and the name is written in Poppins and Roboto, in the dark area at the bottom.
3. The signature, top left, in the version that contrasts: over the light box, in colour.
4. No band and no button: the invitation is loose text; the «see more» lives in the caption.

✕ **TODAY · DdHmpHBOZyI · 10/9**

# A window, not a mix

The franchise enters the retail feed as a window: sparingly and with its own palette.

**At most 1 in 10 posts may be devoted to the franchise; never two in a row; in a visible grid, one only.**

### ✓ WHAT TO DO

Full franchise palette: black, amber, Montserrat.

«KOL FRANQUICIAS» label in a box, one per piece.

Symbol as the shared signature.

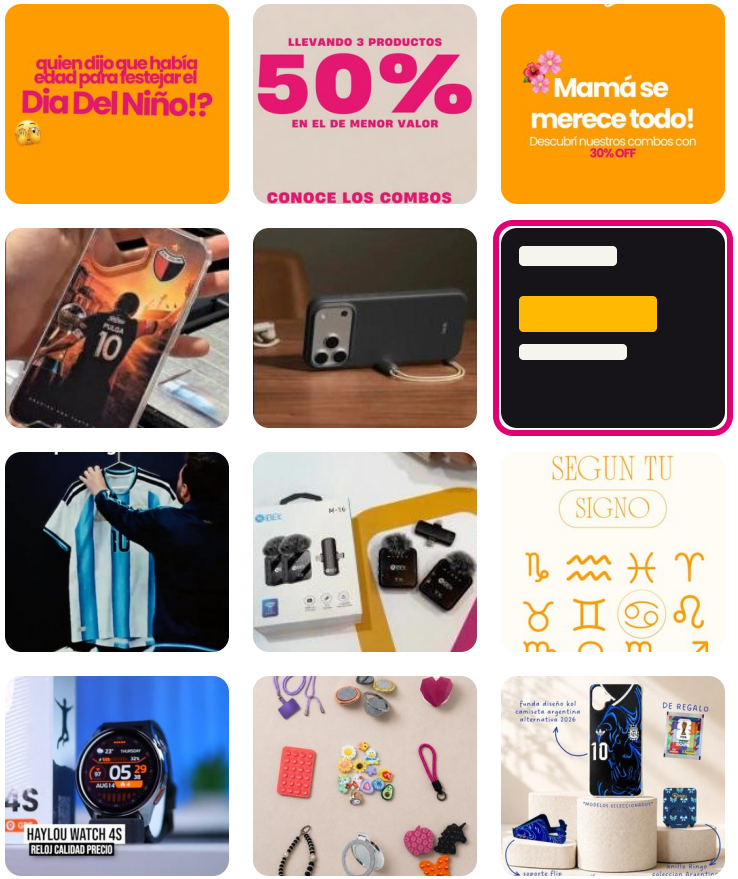
Verified figures: exactly US$ 3,000, never «from».

### ✕ WHAT NOT TO DO

No hybrids: no orange and no Poppins in that post.

No black and no label in retail posts, the avatar or the highlights.

The call to action leads to the franchise page, not to the sales WhatsApp.



Eleven real posts and the franchise slot (marked).

## What is kept

Where the brand is already right is in the real world: on the team's T-shirt, on the car, on the store sign. There it is not a placed signature: it is Kol where people buy.

In the feed pieces, on the other hand, there is still no signature with a fixed place, size and air: that is what this chapter sorts out.

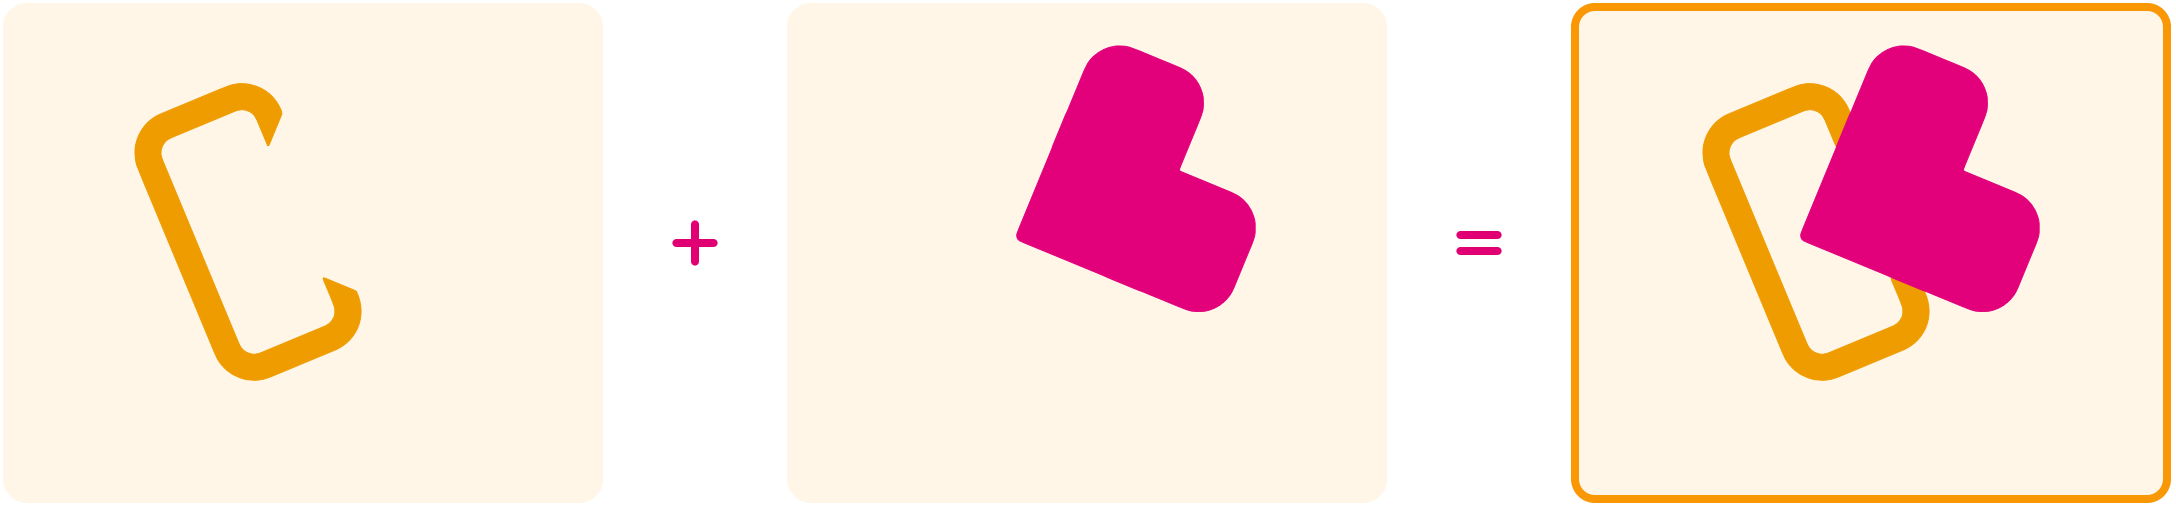
# The symbol is a single piece

Two shapes resting one on the other that read as a K.



**The phone**

**The heart**

**Together they form the K**
the symbol: a single piece

The rule. Always the whole symbol: phone and heart together, in their original proportion and untouched. As a signature, neither the phone alone nor the heart alone exists, and a piece carries the signature only once.

# The tagline «Accesorios para celulares»

kol
Accesorios para celulares

What it says: «Accesorios para celulares» explains what Kol is to someone who doesn't know it. So it goes where the brand is far from the profile: on packaging, a sign, a cover.

When not: in feed pieces (the profile already says it) and at small sizes, where the tagline turns into a line.

# What changes and what doesn't

## → WHAT CHANGES

**1** One single place: top left, 72 px from the edge, instead of five.

**2** One single size: 120 px (minimum 96). It doesn't get shrunk: it gets enlarged or left out.

**3** The background decides the version: in colour, the official square is on orange, or white. Never a white box.

**4** Only real versions, each with its field: the tagline on packaging and signs; as profile, the symbol on orange on both networks.

## ✓ WHAT DOESN'T CHANGE

- ✓ The symbol as the signature: outlined phone + heart, a single piece.
- ✓ The brand in the real world: T-shirt, car, box and sign.
- ✓ The 🧡 in the copy as the signature of tone.

# Colour

Kol's colour was born orange. Over time magenta gained ground and the orange faded away: this manual brings it back to the centre.

## → WHAT CHANGES

1. The 12 type voices become two: Poppins and Roboto, each with its job.
2. Extra bold on everything becomes a single word in 800 per piece.
3. All-caps becomes sentence case; capitals only in short stamps.
4. Thin, small type moves to the 32 px floor, tested at phone size.
5. Mistakes are always checked: accents, ¿ ¡ and voseo; the % and the $, no space: «30%», «$30.000».

## ✓ WHAT DOESN'T CHANGE

- ✓ Posts already published: the rule applies going forward.
- ✓ The type of a licence (Messi, Marvel, clubs) when it is part of the photo.
- ✓ The bio and the caption: Instagram sets them in its own font.

# Three shapes, each with its job

Maximum three per piece. No gradients, no transparencies, no ornaments from another drawing.

### 1 Phone frame · FROM THE LOGO

The rounded rectangle of the symbol's phone, used as a frame that elevates the photo.

### 2 Stamp · FROM USE

Clarifies something in one word, top right. There are ten forms.

### 3 Action arrow · FROM USE

Miralos →

The call to action: verb + arrow as text. Never a button or a pill.

### Why these three

One comes from the logo (the eye already knows it) and two from daily work. Each has ONE job: if a shape does nothing, it doesn't go.

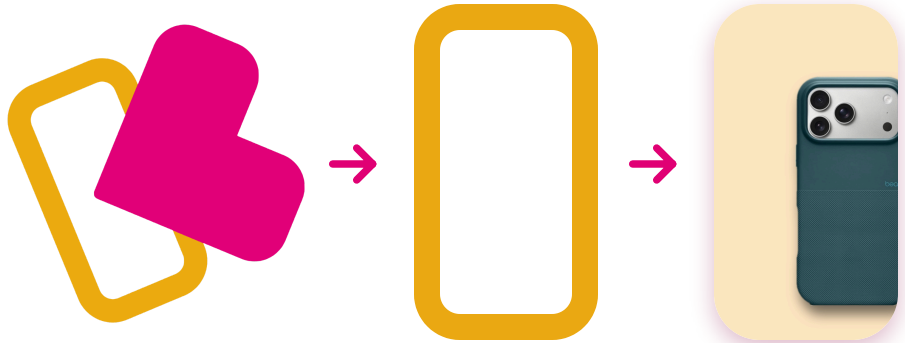
### Supports that stay

The cream card for legal copy on orange and the orange disc of the highlight covers. They accompany: they are not the leads.

Withdrawn: pills and buttons, circled arrows, starfish, background crosses and loose ornaments from another drawing

# The phone frame: the photo, inside the logo's phone

The family's new shape, approved on 13/10: a frame that elevates the photo.



From logo to frame: the symbol's phone is a rounded rectangle with generous corners. Set upright with a photo inside, it becomes the phone frame: the photo sits «in a Kol phone».

The measures, in one line: the corner radius is a quarter of the frame's shorter side [proposal]. Smaller looks like an ordinary photo; larger, like a pill.

Auriculares Haylou Airfree [ejemplo]

1. **The photo goes whole**
   The product is not cropped: the frame is the window, not scissors.
2. **The copy lives outside**
   Title, caption and call to action on the flat background, never on top of the frame.
3. **It lifts off the background**
   Soft shadow and, if wanted, an offset orange backing: that elevates it.
4. **One per piece**
   On orange, peach or cream; the symbol stays in its corner.

Radius and proportions [proposal to be confirmed] · the sample photo is the supplier's (mock-up)

# The phone frame elevates the catalogue photo

The same product: from a panel with labels to a piece with a single shape.

## The catalogue photo, elevated

1. The orange panel with a list of specs left the palette and covered the piece: the details move to the post's caption.
2. No logo in the original: the symbol takes its corner and the new arrival is clarified with the stamp.
3. The supplier's photo (own background, boxes) doesn't shine full-bleed: in the phone frame it looks tidy and the piece is Kol's.

# Phone frame: when yes and when no

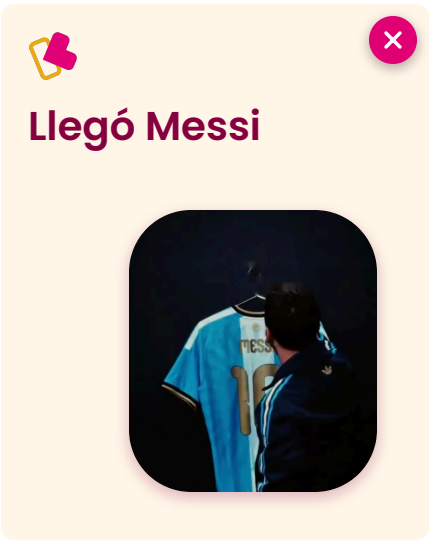
## ✓ WHEN YES

**Supplier packshot**
The catalogue photo, with its background, looks tidy and our own.

**Photo foreign to the feed**
An image from the internet or from a fan enters the system without a disguise.

## ✕ WHEN NO

**A photo that shines on its own**
If the photo has a quiet zone and sells on its own, full-bleed rules (ch. 08).



**Licences and events**
A licence photo goes as is, whole: shrinking it into a frame takes its strength away.

The short rule: the phone frame is for photos that DON'T shine on their own (catalogue, boxes, white background, foreign photos). If the photo is good, it goes full-bleed; if it is a licence, it goes as is. Sample copy [to be confirmed] · DbJioGhucUi is a real post (194 px thumbnail) · clean mock-up photos

**3 The figure stays free**
The stamp neither touches nor covers it. The three products of the combo are seen whole.

**4 Legal copy goes on its card**
The stamp doesn't spell out conditions.

**✓ WHEN IT GOES**

Only if there is something to clarify: an end date, a new arrival, a condition, an occasion. Every promo carries its end date: in the stamp or written in the copy.

**✗ WHEN IT DOESN'T**

If it clarifies nothing, it doesn't go. The stamp isn't scattered «so the piece has something»: without a stamp, the corner stays free and the piece breathes. Never two stamps.

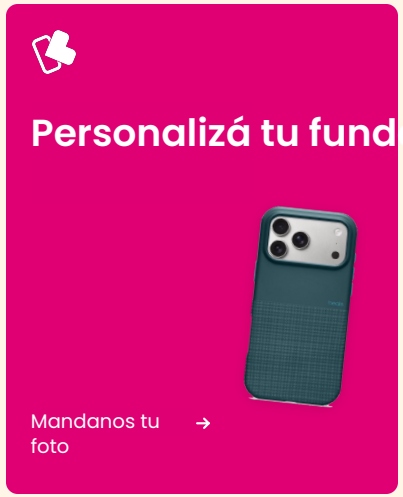
# The call to action is text with an arrow, never a button

## ✓ VERB + ARROW, ALWAYS IN THE SAME PLACE

«Deslizá →» on every slide of the carousel.

The concrete call to action, bottom left.



On magenta, the call to action goes in white.

## ✕ WHAT IS WITHDRAWN

- ✕ The pill or the button: on Instagram it can't be tapped, and it looks like a button that doesn't work.
- ✕ The outlined circle arrow, in any colour.
- ✕ The arrow inside the headline: the call to action is a line of its own.
- ✕ Three shapes and four colours for the same action: the eye never learns where to look.

The rule: verb + arrow in Roboto 600, 40 px on 1080, bottom left. In carousels, the same place on every slide; the last one switches to the real call to action.

Sample copy [to be confirmed] · today there are 20 posts with an arrow in three shapes and four colours [counted]

# What changes and what doesn't

## → WHAT CHANGES

1. Loose ornaments become a family of three shapes: one born from the logo, two from use.
2. The phone frame comes in: the catalogue or foreign photo, elevated inside the logo's phone.
3. The stamp goes top right, only if it clarifies; the call to action drops the button: verb + arrow.

## ✓ WHAT DOESN'T CHANGE

- ✓ The symbol: phone and heart, one indivisible piece, one per piece and whole. The heart doesn't leave it. The
- ✓ full-bleed photo when the photo shines on its own, and the licence as is (ch. 08).

- ✓ Posts already published: the system applies going forward.

**The closing, centred**
The exception: closings, stamps and reel captions may go in the centre.

✕ **EVERYTHING CENTRED: NO**

**Centred, every line starts somewhere else**

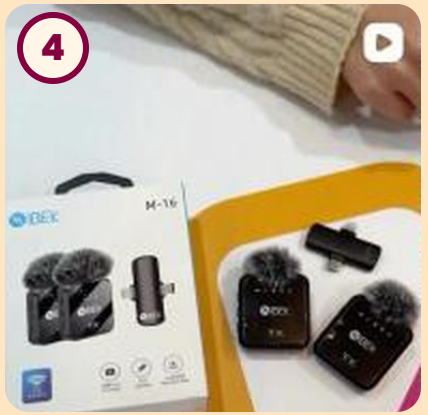
# No Kol, no place and a busy background

1 Generated person. AI look, no Kol. Better a team member.

2 Stock photo of a boy. Generic: it adds no trust. Better a real customer.

3 Machine background. The product gets lost. Reshoot with a plain background.



4 Box and floating text. Cables and labels cover the product. Just one, simple background.

5 Supplier video. Label in English and no brand. Withdraw or redo.

Also avoided: dark or blurry photos, dirty lens, the cursor inside the image (DdpfyMcgylf, Dco5TzHuVvn) and unauthorised third-party logos. Stock, AI or supplier: low median likes (≈ 10 to 36) [by eye].

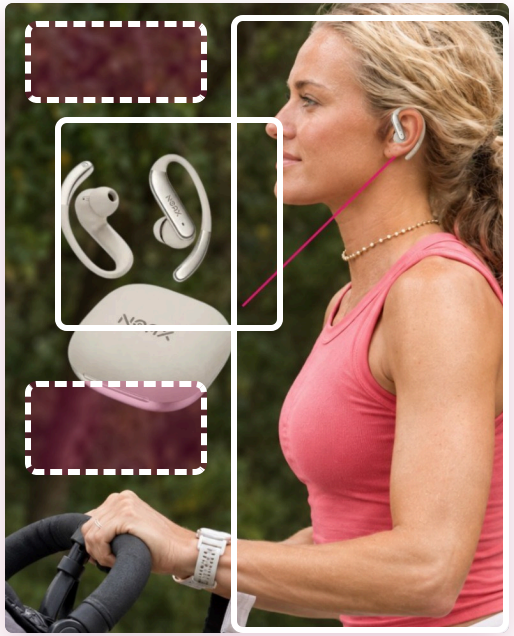
# Before writing, draw the quiet zone

Where the photo is plain and where the product is: that decides everything.

**Supplier background**

The plain lavender at the top carries the headline. Earphones and case are untouched.



**Lifestyle**

The blurred green, at the top or in the middle. Neither the face nor the earphone gets covered.

**Humour with an object**

The plain floor at the bottom and the stone at the top. The folder stays free.

**Store or team**

The gallery floor. The person and the sign aren't covered.

Dotted: quiet zone, where the copy goes

Solid: product or person, not covered

Mock-up photos (old copy erased); the final one comes without copy · sample copy and prices [to be confirmed]

# The supplier's background is respected: copy on top

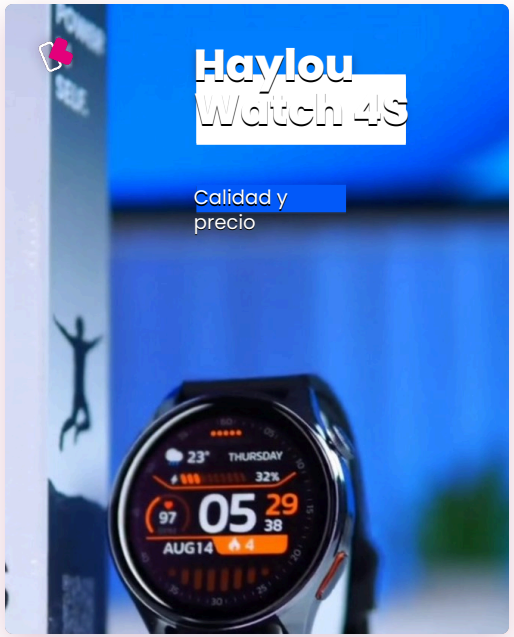
It is practical, it saves the day's post and it looks good: the photo already comes done.

**P02 · Watch with hydrogel**

The black came with the photo: it is respected. White copy with a shadow.

**P03 · Haylou earphones**

Deep magenta on the plain lavender.



**P04 · Haylou Watch 4S**

The plain blue at the top is the quiet zone.

### The supplier's black

Kol doesn't add black. If it comes with the supplier's photo, it is part of the photo and is respected.

It is the exception from ch. 04; P02 is its only example in the manual. The giveaway ball is a supplier background too: the original already works; only the logo is corrected (ch. 04).

What it needs: the supplier's original, no watermark, 2000 px or more.

Copy: on top, in the sky or the plain background, respecting the effect.

Watch out: no cropping, lightening or tinting: the effect is what sells.

Mock-up photos (old copy erased); the final one comes without copy · sample copy and prices [to be confirmed]

# Packshot on light: the air is the quiet zone

The headline goes in the air above or below, never on top of the product.

**P05 · Cases on a hanger**
Headline in the white at the bottom.

**P06 · Extended flat lay**
Plain background added at the bottom; no product is invented.

**P07 · Case on cream**
Headline at the top, in the plain cream.

**P08 · Case in hand**
Plain grey top left; the hand stays free.

What it needs: whole product on white, cream or grey, with air.

Copy: deep magenta in the air; colour symbol.

Watch out: without air there is no piece: extend the background or ask for another shot.

Mock-up photos (old copy erased); the final one comes without copy · sample copy and prices [to be confirmed]

# The World Cup campaign, full-bleed: the pitch is the photo

When the photo already carries the campaign, it is used whole and the copy rests on the plain part.

## ✕ TODAY · 20/6

White outlined headline covering the pitch and prices in pills: the photo ends up low and cramped.

## ✓ LIKE THIS · THE SAME CAMPAIGN, FULL-BLEED

**The whole pitch**

The headline on the plain grass, at the top; the podium and the three products, whole (5.5 to 1 with a soft shadow).

**The World Cup case**

Tight framing: the whole case and the prices as text on the grass beside it (5.5 to 1).

### Why it works

- ✓ The campaign is in the photo: the green of the pitch and the blue of the jersey live inside it; Kol doesn't paint the background.
- ✓ The copy goes in the quiet zone (the plain grass), white with a soft shadow; never over the case or the podium.
- ✓ Symbol for photos top left, at 72 px; title and prices in Poppins and Roboto, with the sign attached.
- ✕ No price pills or outlined all-caps headline: they compete with the photo.

Real post DavrPQtOUYj: photo without the headline or the pills, grass restored [mock-up] · prices from the original post [to be confirmed] · WCAG contrast in the copy area

# The logo's rectangle elevates the photo

When the photo has no quiet zone, the copy moves onto the colour and the photo stays whole.

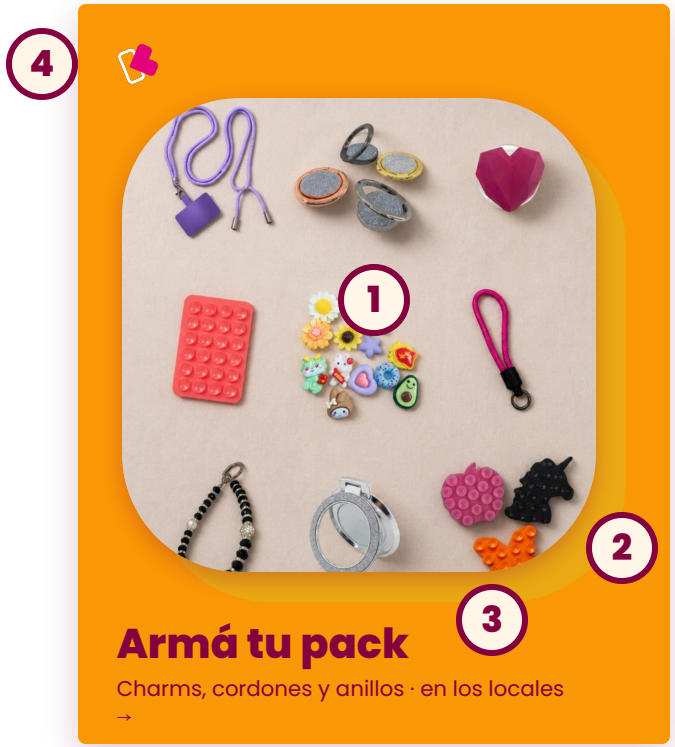
**1 The photo, in the phone's rectangle**
The corner radius is a quarter of the shorter side, like the symbol's phone (ch. 06). The product isn't cropped.

**2 The elevation**
The same rectangle repeats behind, in amber, offset bottom right: the photo looks as if resting on the colour. No thin frame or border.

**3 The copy goes outside the photo**
On the solid colour, never on top of the image: that is why it works for busy photos with no quiet zone.

**4 Symbol on the background**
In its version for orange (white outline and magenta heart), top left, outside the photo.

When it is used: catalogue photos or ones busy edge to edge (collages, flat lays, boxes) that full-bleed have nowhere to rest the copy.



**Catalogue photo with no quiet zone**
The flat lay goes in whole; the copy lives on the colour.

Shape and measures: ch. 06 [proposal to be confirmed] · supplier catalogue photo (mock-up) · sample copy [to be confirmed]

# The same frame, three backgrounds

Orange by default; peach and deep magenta according to the pillar (ch. 04).

**DaJaaOIAG18 · On orange**
Customer collage: one whole photo is taken.

**On peach**
Orange elevation; deep magenta copy.

**On deep magenta**
Big, heavy white copy; white symbol.

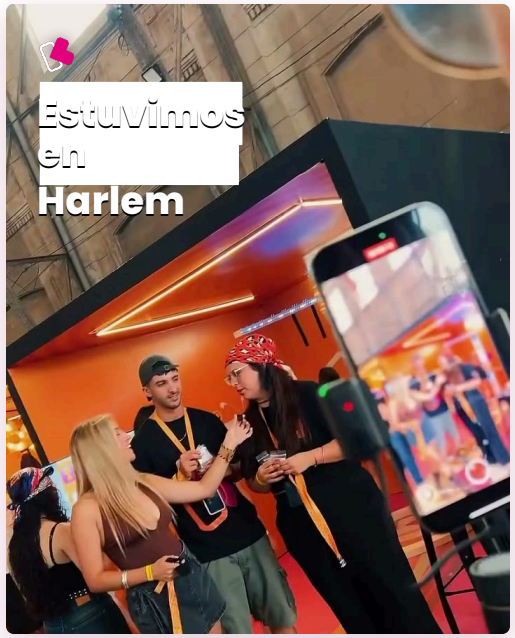
## What is fixed and what is free

- ✓ Fixed: the phone's radius, whole photo, copy outside, symbol top left.
- ✓ Free: the background colour (by pillar), the elevation's colour and the photo.
- ✗ Never for licences or events: those photos go full-bleed, as is (two pages ahead).

White copy on deep magenta: 10.1 : 1 · mock-up photos · sample copy [to be confirmed]

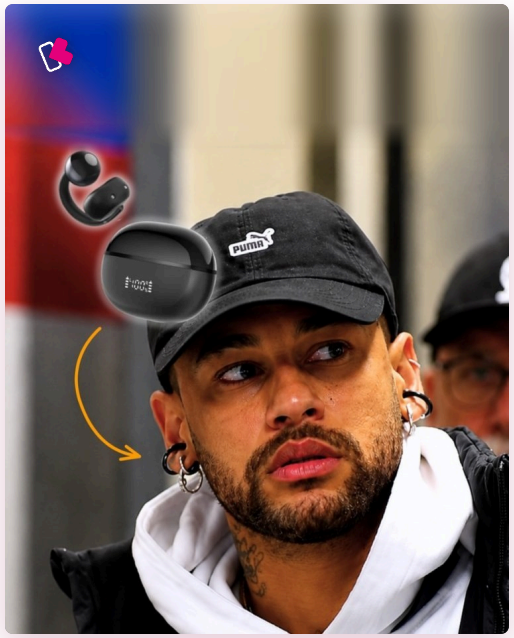
# Licences and events: the photo goes as is

A filter ruins what the licence sells. And the copy doesn't cover: it rests on the empty part.



**Event: stand at Harlem**
The photo as is; the headline on the ceiling, away from the stand (3.3 to 1 not counting the shadow).

**Licence: the jersey**
The copy moves up to the black at the top: the jersey and the person stay free (18.4 to 1).



**DaGTWGiOPaH · Celebrity + product: Neymar**
With no empty spot that doesn't touch the person or the product: the piece goes with the symbol only and the copy moves to the caption.

## The licence is untouchable

- ✓ The photo is used as is: it sells because the real image shows.
- ✓ Only the symbol and a short text are added where there is nothing: ceiling, wall, plain background.
- ✗ The copy never steps on the person, the jersey, the product or the character.
- ✗ No filter, no duotone, no crop, no frame and no colour bands.
- ✓ Usage is confirmed in writing with the licence holder [to be confirmed].

## What to ask the supplier for

- ✓ The original with no copy, no logo and no watermark.
- ✓ In 4:5 and 9:16, with 30% air at the top or bottom.
- ✓ Plain or blurred background behind the product.
- ✓ Both versions: with the effect and without it.
- ✓ Written authorisation for use on Kol's social media.

## And the store teams

- ✓ Phone held vertically, daylight, clean lens.
- ✓ The person and the product to one side, not in the centre.
- ✓ An extra shot with air at the top, for the headline.
- ✕ No filters or app text on the photo.

It looks good when it comes with air and the whole product: the brand is added on top.

It looks bad when it arrives with labels, a watermark or text in another style stuck on.

If it arrives badly: ask for the original; if there is none, erase the copy (mock-up) or don't use it.

# MagSafe: what fails is how the copy reads, not the photo

✕ ORIGINAL · DBGAYGLLKFE · 1/8

Copy at the edge and no symbol.

1. Uneven contrast. White on light wood: median 4.3 to 6.3 : 1, but the worst 10% drops to 2.7 to 3.7. → Double
2. deep-magenta shadow: median 7.4 to 8.0, worst 10% 4.3 to 5.7. Words stuck together (tracking ≈ -9%): «Compatiblecon». Size ≈ 42 px. → Poppins 700, normal spacing, 46 px.
3. Thin leader lines (≈ 3 px): on the wood they drop to 1.6 : 1 in the worst 10%. → 4 px, with a shadow and a dot.
4. Bottom labels over a beige jacket and cobblestones, right at the edge. → More shadow, 72 px from the edge; symbol top left.

1. Bright magenta on three backgrounds (grass, skin, skirt): median 2.9 : 1, worst 10% 1.7. → All the copy on the white skirt, deep magenta: 7.4 : 1 (worst 10% 5.4). Capitals with words stuck together («BLUETOOTHNOAX»). → Upper and lower case, Poppins 600/800: 42 and 53 px.
2. 
3. Pill button with an arrow and the old logo at the bottom. → Arrow written next to «NOAX Flow»; the old logo is erased and the symbol goes top left.
4. Thin magenta leader line on the grass: median 2.7 : 1. → White, 4 px, with a shadow and a dot on the earphone.

✓ ADJUSTED

# Samsung S26: the copy got lost on the case

✕ ORIGINAL · DBEXIOZLKA2 · 30/7

Greyish blue copy over the cases.

1. Greyish blue on a black and grey case: the first line reaches a median of 2.6 : 1 and 1.5 in the worst 10%. → Copy in deep magenta on the white table: 9.7 : 1. The blue isn't the brand's. → Deep magenta, the colour of all the copy.
2. 
3. The copy covers the case, which is what is being sold. → It moves down to the white table, left-aligned on a single axis; the cases stay clean, without the smudge of the old copy. Circular button with an arrow and small grey type. → «Línea Samsung S26» in Roboto 600, 35 px (floor: 32), no button; the headline in Poppins 700, 46 px.
4. 

✓ ADJUSTED

Same photo, clean cases; the block on the left of its axis, on the table, 72 px from the edge; symbol at the top.

Estimated by sampling + WCAG formula (stroke edge, 1 to 3 px) · photo reconstructed without the original copy

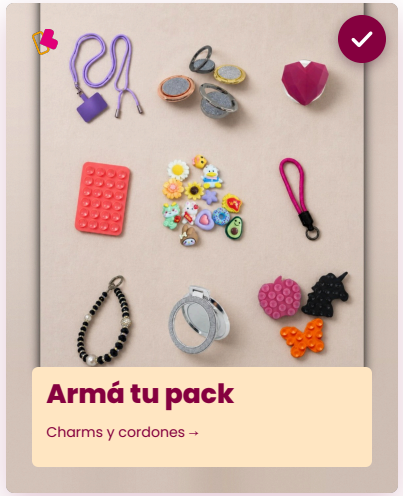
# The colour block, only where it covers nothing

Always with margins, never edge to edge: three posts where it goes and two where it doesn't.

## ✓ GOES: THE AREA WAS ALREADY FREE

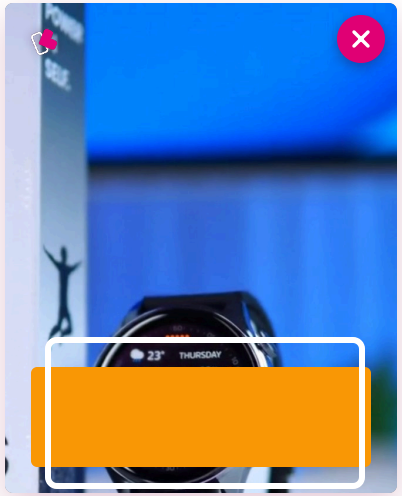
The air at the bottom was white: the block, with margins, touches no case.

The plain lavender at the bottom takes the block; the case stays whole.



The bottom area was extended with a plain background: the block lives there.

## ✕ DOESN'T GO: IT WOULD COVER WHAT SELLS



The watch and the strap reach the bottom: the block cuts them.

The face is at the top: the block covers it.

The rule isn't «no block»: it is choosing the post better. The block goes with margins (72 px, like the copy), never edge to edge, and only where the photo already had a clean area (the quiet zone drawn before writing); if it has none, the copy goes loose with a shadow, the phone frame is used or another photo is chosen. The solid line marks what the block would step on.

# An even feed, even when the photos are foreign

1. **The constants create the unity**
   Symbol top left in every cell and a stamp only if it clarifies: the supplier's photo, the licence and our own coexist.

2. **7 foreign photos, spread out (rings)**
   Never two in a row nor two dark ones side by side. Each goes in full-bleed with the copy in its quiet zone, or in the phone frame if it has none.

3. **9 solid-colour pieces between photos**
   Orange, white, peach and cream lower the noise between two photos from different sources: the feed «with a bit of everything».

Then it is measured: whether the feed reads as one brand in 3 seconds, and how full-bleed and solid colour perform with the same topics [to be measured].

# Good photos and videos with the phone: twelve habits

### 1 Clean the lens
Before every shot, with a cloth. Half of the blurry photos are a dirty lens.

### 2 Light from the front
Face the light from the store or the door; not with the window behind you.

### 3 No flash
It burns the reflections on cases and glass. If light is short, move closer to a source.

### 4 Simple background
A clear stretch of counter or the wall; no cables, boxes or papers.

### 5 Tidy counter
Only the product being shot, the logo and 2 or 3 products in the background.

### 6 Always vertical
9:16 for reels and stories; 4:5 for the feed.

### 7 Eye level
For people, the phone at eye level or just above; never from below.

### 8 Hands showing
With both hands, about 30 cm away, turning it slowly. What worked best.

### 9 Stability
Elbows against the body or the phone resting on something; when walking, short steps.

### 10 Short takes
5 to 6 seconds; better ten short takes than one long one.

### 11 Leave air around
Don't fill the frame: the copy goes later in the middle stretch, not in the bottom 35%.

### 12 Look before saving
Make sure the product shows, with no reflections and no other customer's data (screens, receipts, chats).

## → WHAT CHANGES

1. Foreign photos (supplier, licence, internet) enter the system: full-bleed, with symbol and stamp.
2. The copy goes in the quiet zone, measured; if the photo has none, the phone frame elevates it and the copy moves onto the colour.
3. The colour block stays only where the photo already had a clean area.
4. Supplier photos are requested with air, in 4:5 and 9:16, with no copy or watermark.
5. AI improves the real photo; it never invents people.

## ✓ WHAT DOESN'T CHANGE

- ✓ The supplier's dynamic background: it is respected and written over.
- ✓ Licences as is, no filter: they sell through the image.
- ✓ The product always visible, whole, never cropped.
- ✓ What already performs: the team, the hands and the real store.

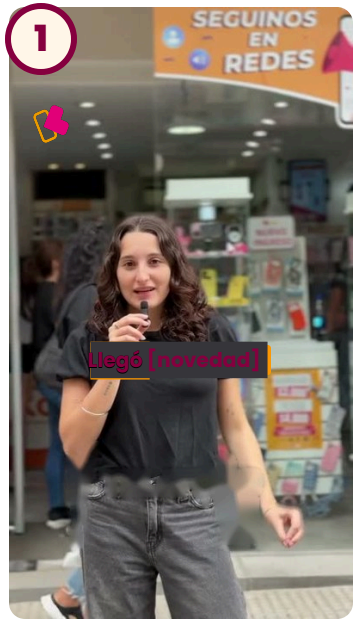
1. 3:4 box: the grid crops the cover. Copy and symbol go in there.
2. Today: 30 of 59 covers carry text; many lose it or make it small.
3. Like this: symbol top left (72 px); 3 to 5 loose words, weight 700, white with a shadow. No box: where the photo has air.
4. Photo: person or product in use, whole. Not a collage or a price in the pinned post.

Real cover from DeS7GZCgmko (black video border cropped) · the phrase is the post's own idea · never over the case or the hands

# Script 1 · Talking to camera in the store

For a new arrival or 3 products in a category · 30 to 40 s · a team member's voice.



**0–3 S**

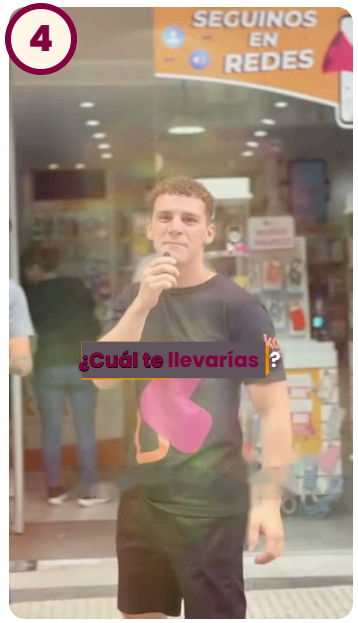
Screen: «Llegó [novedad]»
Says: «Llegó [novedad]. Antes que nada, protegelo.»

**3–8 S**

Screen: word by word
Says: «Primero elegí cómo cuidarlo. Acompañame.»

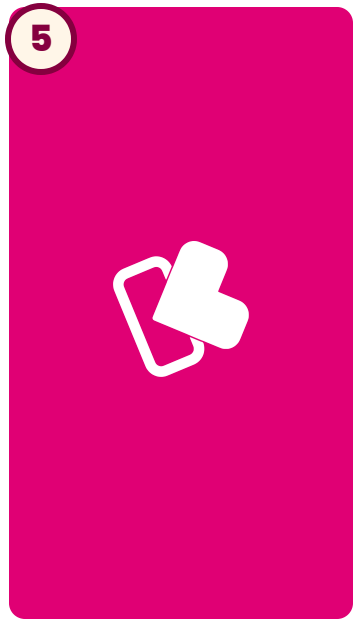
**8–20 S**

Screen: product name
Says: «Estas fundas tienen [algo real].» And the glass, likewise.



**20–36 S**

Screen: the question Says: «Los cargadores... ¿cuál te llevarías?»



**CLOSING**

Screen: symbol, 2 or 3 s. Sound: low music.

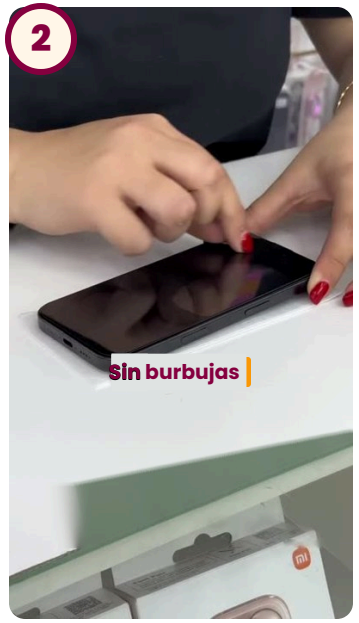
Based on the S26 (21.1K views) · measured: views and comments with a question, answered the same day · real frames, sample copy

# Script 2 · Try it with me (demo)

For screen protectors, cases, chargers · 25 to 35 s · gentle humour, with a demo phone.

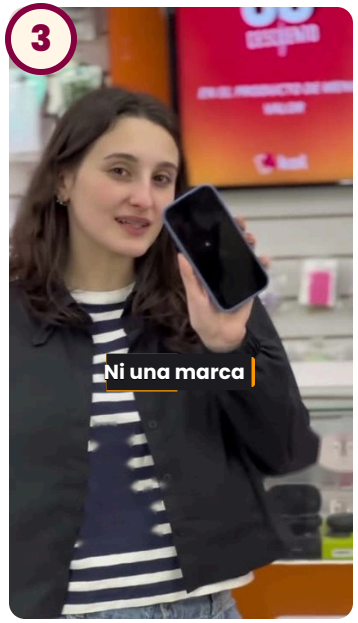
**0–3 S**

Screen: «¿Se rompe?» Says: «A ver si aguanta.»



**3–12 S**

Screen: «Sin burbujas» Says: «Mirá qué fácil se coloca.»

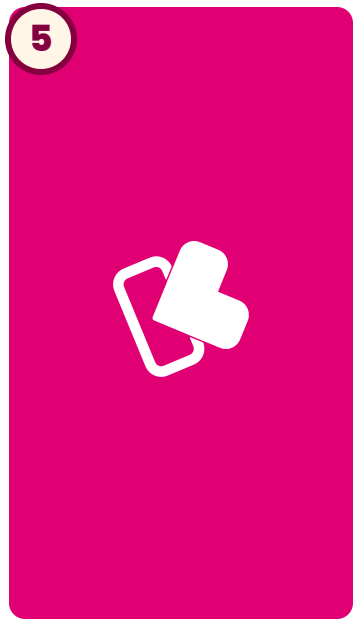


**12–24 S**

Screen: «Ni una marca» Says: «Ni una marca.» (only if it was filmed)

**24–30 S**

Screen: the question Says: «¿Y vos, te animás a probarlo?»



**CLOSING**

Screen: symbol, 2 or 3 s. Sound: low music.

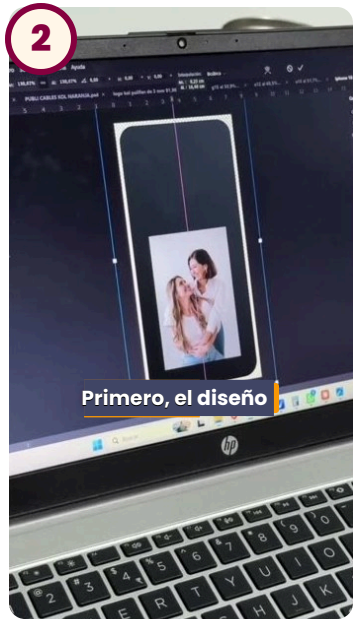
Based on the Glass (12.7K views) · measured: views, comments and messages · never a customer's phone · «Ni una marca» only if it was filmed in full

# Script 3 · This is how your case is made (process)

For personalised orders and gifts for special dates · 25 to 35 s · can go without voice, with text at each step.

**0–4 S**

Screen: «Regalos que se guardan» Shows: the finished gift.



**4–10 S**

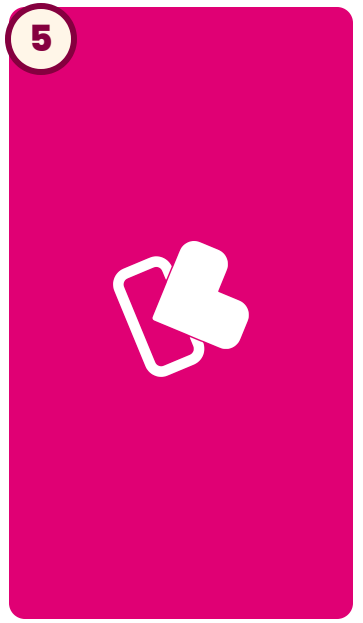
Screen: «Primero, el diseño» Says: «Lo armamos con tu foto.»

**10–22 S**

Screen: «Después, la impresión» Says: «Se imprime acá» [to be confirmed].

**22–29 S**

Screen: «Pedila por WhatsApp» Says: «Mandanos tu foto y la hacemos.»



**CLOSING**

Screen: symbol, 2 or 3 s. Sound: low music.

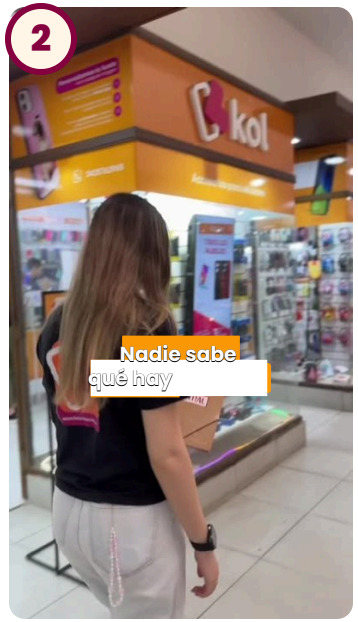
Based on Messi (19.1K) and corrects mum's (2.4K): the finished gift first · the customer's chat and photo, only with permission

# Script 4 · Team and intrigue (one thread object)

For new arrivals, launches and store news · 20 to 30 s · a single thread object, can go without voice.

**0–3 S**

Screen: nothing: the «Confidencial» envelope speaks for itself. Sound: music, no voice.

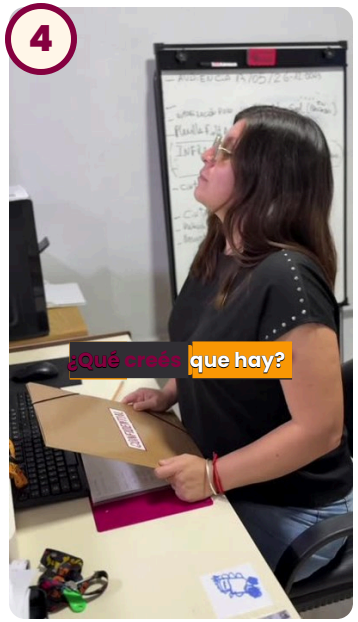


**3–12 S**

Screen: the intrigue grows Shows: the folder travels around the store.

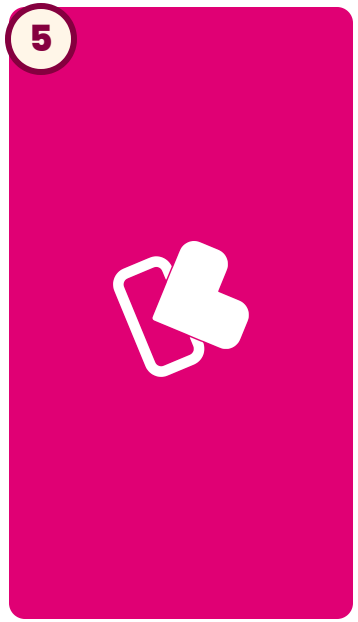
**12–20 S**

Screen: the question settles in Shows: it passes from hand to hand.



**20–25 S**

Screen: «¿Qué creés que hay?» Shows: they open it, without showing.



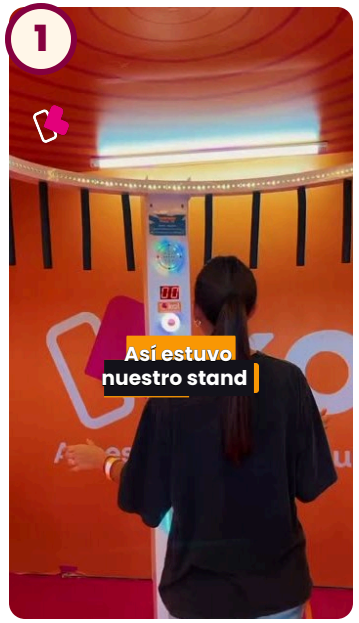
**CLOSING**

Screen: symbol, 2 or 3 s. Caption: «mañana lo contamos».

Based on CONFIDENCIAL (98.9K views, before the period of the 108 posts) and adds what was missing: a question and text (it got 0 comments)

# Script 5 · Event (concerts, fairs, stands)

For concerts, festivals and fairs · 15 to 30 s (Harlem ran 51) · no voice or a single phrase.



**0–3 S**

Screen: where we were
Shows: the stand, packed.

**3–15 S**

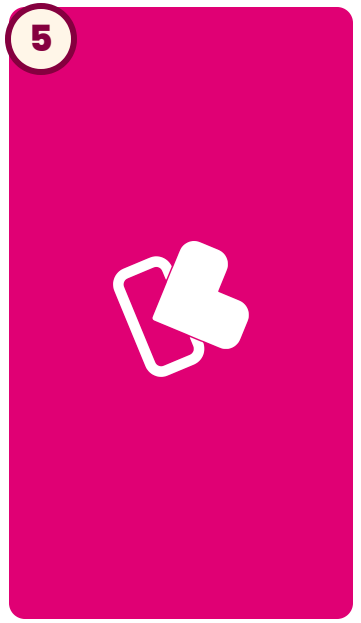
Screen: 4 takes of 3 s
Shows: people playing.

**15–22 S**

Screen: «Estuvimos con [qué]» Says: «Regalamos [qué].»

**22–27 S**

Screen: «¿Estuviste?»
Shows: a team member, to camera.



**CLOSING**

Screen: symbol, 2 or 3 s.
Caption: next date [to be confirmed].

Based on Harlem 2025 (22.4K views) and corrects the central idea and the fixed logo at the bottom (here, framed without it) · measured: views, reposts and comments

### Customers, part 3 · 2,203 views

**SOLVED WHEN SHOOTING**

It isn't redone over the old video: the faces belong to customers without permission and the case fills the whole frame, so any text would cover it.

Next time: ask for permission first (see «Permissions», further on), open with the customer's real phrase, «No la había conseguido en ningún lado», and frame the case in the top half so the phrase has its place.

No crossed-out price or store labels at the bottom.

**Your profile goes here**

That's 10 stores of people who know. The full team sheet is built with Kol: name, store and favourite product of each one.

The profiles put a face on the brand: people buy from people. Names on screen only with each person's written approval.

Frames from real reels · roles deduced from the videos [assumption] · names, stores and phrases: to be confirmed with each person

# Five series with a name of their own

The five scripts become series people look forward to.

### DETRÁS DEL MOSTRADOR

**The one that reaches the most new people**

Short stories from the team: an intrigue, a stock arrival, a day at the store.

### PROBALO CONMIGO

**The most convincing one**

A team member tests the product live: drops it, wets it, charges it.

### ASÍ SE HACE TU FUNDA

**The one nobody can copy**

From the file to the printed case, with an emotional reason up front.

### EL EQUIPO RECOMIENDA

**The easiest to shoot**

One person, one favourite product, 20 seconds to camera.

### UN DÍA EN...

**The one that shows the 10 stores**

Galería Colonial, Shopping La Ribera, Córdoba capital: each store, its people and its audience.

A named series organises the grid and creates an appointment: the name goes on the cover and in the first line of the caption. Each series runs at least once a month and never more than once a week.

Series names: proposal [to be confirmed with Débora and the team] · frames from the reels that inspire each series

# Faces, with permission; emotion, always

✓ TEAM

### Face in view; name only if they approve

Verbal permission already given; the written record is signed before the campaign. If someone leaves Kol: to be confirmed with legal counsel.

✓ CUSTOMERS WITH PERMISSION

### Face and reaction: pure gold

A WhatsApp message with «sí, autorizo», saved. Minors: only with a responsible adult.

✓ CUSTOMERS WITHOUT PERMISSION

### Hands, backs, the product

The emotion is told just the same: the case in the hand, the reaction from behind, the queue at the counter.

✕ WHAT DOESN'T GO

### Faces covered with blurs

Neither in the feed nor in the manual: the blur gives the problem away. If the face can't be shown, another frame is chosen.

## How to ask, in three sentences (always before filming or posting)

1. **¿Te podemos filmar con tu compra? Es para nuestras redes.**
2. **Solo se ve tu [cara / manos / funda]. ¿Te parece bien?**
3. **Si querés, te lo mandamos antes de publicarlo.**

If they say no, don't insist. Everything goes into a single spreadsheet: date, store, person, what was filmed and how it was authorised.

Single rule for pieces and manual (12/10/2026) · not legal advice · permission form: still to be drafted with Kol

---

**TO GROW WITHOUT BURNING OUT THE TEAM**

Two reels a week: one anchor (produced) and one light (a single pass). · Every week a different person, from a different store, shoots: nobody carries the pillar alone. · Shoot in pairs: one acts, the other films. Half an hour a week is enough. · If one week it doesn't happen, don't force it: better one reel fewer than one without a hook.

Proposal to test for 6 weeks [to be confirmed with Débora and Kol] · the order of stores is an example

# What changes and what doesn't in reels

## → CHANGES

1. Hook in 2 seconds: an image in action and a short phrase.
2. Captions without a band, at 64 px, with one key word in orange, at 55-62% of the height.
3. Nothing important in the bottom 35% or the top 14% (ch. 07).
4. A single question and a closing with the symbol for 2 or 3 s, not with an email or a fixed logo.
5. Cover with the symbol and 3 to 5 words inside the 3:4, no box and without covering the main thing.

## ✓ DOESN'T CHANGE

1. Real people from the team and the real store, with image permission.
2. Test it live, with demo gear, never a customer's phone.
3. Process with emotion: it is Kol's own format.
4. A single thread per reel, 20 to 40 s.
5. «Responsable de local» (store manager), not «vendedor/a» (salesperson).

---

Before posting, the manual's single checklist (at the end of ch. 11 Voice, tone and copy); for a reel, add: hook in 2 s and permission from every person who appears. 6-week experiment: 2 reels a week with these scripts; each is compared against the median of 3,089 views, not against the best reel.

Everything labelled «hypothesis» comes from 8 reels: it is measured in the 6-week test of ch. 10 Pillars

# Cases can be found in many places.

# The people of Kol, in only one.

This pillar grows if every week someone from the team turns the camera on for half an hour. The rest —the series, the hooks, the captions— is already in these pages.

The first step: this week, a «Probalo conmigo» with the product people ask about most.

# The warmth already exists; the signature gets unified

## 5 Warm: what they already do well when they reply

**Real comment · Mother's Day post**
«¿arreglan? ¿dónde conecta el auricular?»

No visible reply. An unanswered question is a customer who leaves.

**Real reply from the brand**
«sii 🙌 llevando 3 productos, el de menor valor queda con 50%...»

The warmth already exists: when Kol replies, it replies well, keenly and in voseo. What is missing is for that voice to reach every question, in the same close register as the captions.

---

🧡 The signature: today it is in 3 of every 10 posts and gets diluted across 10 heart colours. Signing is nice: it is unified as the orange 🧡, once only, at the close.

The counter test: if someone from the store wouldn't say it out loud without it sounding odd, it doesn't go.

# Four volumes of the same voice

The register depends on what is being told, not on how much we want to sell.

## Fun

When: entertainment, playful dates, series Careful: Never at the customer's expense or on sensitive topics.

**EXAMPLE**

Pov: cada vez que sale bien una funda 🥹

## Emotional

When: personalisation, Mother's Day, idols Careful: No humour or double punctuation; for memorials, a sober tone.

**EXAMPLE**

Hay regalos que se convierten en recuerdos para llevar todos los días 🧡

## Informative

When: launches, service, stores Careful: One clear line before a spec sheet.

**EXAMPLE**

¿Sabías que el Glass es la protección que más se vende? La mejor para tu pantalla 🧡

## Urgent

When: promos with a real expiry Careful: Urgency without a date wears thin: no date, no «urgent».

# What Kol doesn't do (and what was seen today)

**× Doesn't ask for likes or «compartí para ganar»**
«¿Cuál elegís?» already does it well.

**× Doesn't pin prices**
The pinned post has said «$15.200» since 25/8.

**× Doesn't post promos without an end date**
Of 18 posts with a price, 1 says until when.

**× Doesn't use tuteo**
«Comenta», «Acompaña», «Conoce»: to voseo.

**× Doesn't shout or chain «!!!» / «???»**
33 posts open in all caps.

**× Doesn't call the job «vendedor/a»**
It is «Responsable de local», always.

**× Doesn't use hashtags in other languages**
Today: #trends, #lifestyle, #viral, #desconto.

**× Doesn't leave a question unanswered**
«Catálogo por favor» is still unanswered.

**× Doesn't paste Instagram's copy on Facebook**
It is adapted: the practical fact first.

**× Doesn't invent people with AI**
AI improves photos; it doesn't create people.

**× Doesn't show people without permission**

**× Doesn't post licences without checking**

# How the copy is built: line breaks

«Mamá se / merece todo»: each line is an idea.

✕ NOT LIKE THIS

Mamá se merece
todo

«todo» is left alone on the second line: an orphan word.

## 2 No orphan word or separated article

✓ LIKE THIS

Tu funda, hecha
en el día

The last line is shorter and makes sense on its own.

✕ NOT LIKE THIS

Tu funda, hecha en
el día

«en el / día» split: the article is far away and «día» is left alone.

The quick test: read each line out loud as if it were a sentence. If any line says nothing on its own («en el», «todo»), the break is in the wrong place: move one word and done.

# One list of stores, four channels, the same day

## A single official list of stores

The 10 stores, by place, with address, city, opening hours and WhatsApp (the stores table, in 11.2). If a fact isn't on the list, it isn't published.

- **Instagram**
- **Facebook**
- **The website**
- **Google**

### The same day

If something changes (a move, a holiday, new hours), the official list is corrected first and then the four channels, the same day.

It is a light suggestion: 30 minutes a month of review are enough so nothing expired stays published.

# A single list before posting: 16 points

One minute per piece. If a point fails, it isn't posted: it is corrected and run through again.

## The copy

1. **In voseo and with accents?** It sounds like someone from the store, without shouting.
2. **Opening ¿ and ¡?** A single mark at the close; no chains.
3. **Caption in order?** Hook, benefit, 📍, hashtags and 🧡 once.
4. **Facebook, adapted?** Practical fact first; not copied.

## The piece

5. **Understood in 2 s?** And if it is video, it hooks in 3 s.
6. **Whole product?** In sight, not cut by the edge.
7. **Symbol in its place?** Top left, without «kol», 72 px.
8. **Legible copy?** 32 px or more, outside what the app covers (ch. 07).

## The facts

9. **$ and % attached?** «$15.200», «30%»: one form per fact.
10. **Promo or giveaway with a date?** «hasta el 31/10»; the giveaway, with its date in the stamp.
11. **Official stores?** Store and city, as in the stores table.
12. **Nothing expired?** Pinned posts and highlights up to date.

## The permissions

13. **People with permission?** In writing; AI doesn't invent people.
14. **Licences checked?** Messi, clubs, Marvel, Disney.
15. **Mentions authorised?** The full @ handle, checked.
16. **Captions on?** And alt text on the images.

It is the manual's only checklist: it replaces the three from the previous version · who checks: to be defined with Kol

# What changes and what doesn't

## → WHAT CHANGES

1. Voseo with accents, «¿» and «¡», one call to action and the 🧡 signature in every caption.
2. The 📍 line, prices and dates are always written the same.
3. The copy on the piece: aligned, broken by meaning, with only one thing that shouts.
4. Facts are checked before posting; nothing expired stays in view.

## ✓ WHAT DOESN'T CHANGE

- ✓ The personality: close, kind, youthful, with gentle humour.
- ✓ The humour with a question and the warmth that already exist.
- ✓ The idea of each post: how it is written changes, not what is said.

**The voice already exists: this chapter only puts it in order.**

Closing of chapter 11 · the 16-point list, on the previous slide · next, ch. 12 · Where we're headed

# Where we're headed

# A system so the spark shows more

The manual doesn't invent a new brand: it puts in order the one already in the feed, so every post is recognised in two seconds and reaches more people.

### 1 Where we start from

108 posts measured one by one. 58.7% of the views already come from people who don't follow us, and reels are the door: 45% new people.

→

### 2 What the manual puts in order

The fixed —logo, colour, type, shapes, place and air— so the free can shine: the idea, the joke, the product of the day.

→

### 3 What comes next

Canva Pro with rebuildable templates that take care of these rules on their own: built after the manual is approved.

Data from ch. 00: 90-day Insights to 10/10/2026 and the 108 posts of 18/5 to 10/10/2026 [counted]

# The spark is still Manu's

The fixed looks after the brand; the free brings it to life.

**The vibe, the humour and the creativity of the account stay with Manu, who runs Kol's social media and online community.**

This manual gives a system, not a corset: it measures what works and makes it repeatable. A post showing up as improvable is not personal: it was measured.

And what is already done well —the orange, the real people, the symbol, the 🧡— is exactly what the manual protects.

### ✓ FIXED · THE SYSTEM

- Symbol top left, at 72 px
- Orange as the lead; no black, no brown
- Poppins and Roboto; «30%» and «$30.000» attached
- The product always whole

### → FREE · THE SPARK

- The idea and the joke of each post
- Which product, which person, which moment
- The reel of the day and its series
- The photos of the store and the team

**Next step: templates in Canva Pro and the whole feed telling the same story.**
